- 16. Curriculum map

1. Course Overview		
Full course/award title(s)	BA (Hons) Media and Communications	
Course Code	UBAA_0016_FR	
Fees	Please see the tuition fees on the Regent's University London website (https://www.regents.ac.uk/admissions/tuition-fees)	
Location of study	Regent's Park Campus	
Off campus elements / locations	Not applicable	
Awarding institution	Regent's University London	
Course entry points	September 2023 / January 2024	
Date of original validation / revalidation	November 2022	
Validated until	September 2028	
Framework for Higher Education Qualification level of final award	Level 6	
Number of credits in award	360 credits	
UCAS codes	BA (Hons) Media and Communications: <b>A032</b> BA (Hons) Media and Communications with Liberal Arts and Media Foundation: <b>A031</b>	
Relevant QAA subject benchmark statements	Quality Assurance Agency (QAA) benchmarking statements: Communication, Media, Film and Cultural Studies December 2019	
Other external and internal references	QAA Framework for Higher Education Qualifications (FHEQ) Regent's University London Academic Regulations Regent's University London Learning, Teaching and Assessment Strategy Regent's Learning Outcomes (RLOs) (2021) Regent's Assessment Framework (2022) Advance HE Principles of Inclusive Curriculum Design	

	Regent's Learning Design Framework: RADAR (2020)
Professional, statutory or regulatory body recognition/accreditation	Not applicable
Mode of study (Full Time / Part Time)	Full time
Language of study	English
Minimum / Maximum duration of course for each mode of study	Full time:  Minimum - 4 years including the integrated foundation (level 3)  3 years without the integrated foundation (level 3)  Maximum*- 6 years including the integrated foundation (level 3)  5 years without the integrated foundation (level 3)  * In exceptional circumstances only – refer to Regent's University London Academic Regulations for details
Date of production / revision of this course specification	November, 2022

# 2. Why study this course, including course aims and objectives

The BA in Media and Communications offers a critical examination of the history, development and future of the media and communications industries. This course develops multi-skilled media professionals with the flexibility to apply skills to a range of positions within this rapidly evolving industry.

We equip students with the theoretical grounding and practical skills to evaluate continuities and changes in traditional and digital media, critically reflect on the roles of consumers and media content creators and collaborate on a variety of media projects. Critical thinking and storytelling are at the heart of this course. Students are encouraged to reflect on how identities and cultures are shaped through and within media and to consider how to lead the change in an increasingly intercultural world. Teaching media and communications from a global perspective is essential for this program.

This is a multidisciplinary area of study where students engage in current industry trends and discussions. London is one of the creative capitals of Europe and we organise regular field trips, for example, to the Guardian, National Archives and Postal Museum. London's leading media institutions provide valuable social connections and insights into the media industry. Recent guest speakers include representatives from Google, Meta and new startups such as Wunder.

Production skills are embedded in the curriculum across the degree. In creative workshops, students produce content using a variety of digital tools and platforms. This includes video, photography, social and digital media as well as traditional methods of communication. You will receive free Adobe Creative Cloud licences, have access to our TV studio, broadcast standard equipment and software including Red, Sony and Black Magic cameras, Foley Studio, sound mixers and Celeb lighting. Our students are taught in small classes with active participation by a team of academic and industry professionals. We encourage the voices and experiences of all students to be brought to each activity. During your learning journey, you encounter key concepts, theories and media cases. Your understanding will be further enhanced in the second year, which will give you the tools and skills to express yourself through a showcase portfolio and individual projects in your final year. You will have the opportunity for an internship and the chance to study abroad at universities including University of Technology Sydney, Pace University New York City, University of Virginia and the University of Nashville. You can also study nine different languages from beginners to advanced level.

Most of our students are aged between 18-22 but we also welcome mature students. Our students come from over 100 different countries from around the world. Students enrolled in this course are interested in careers in Social Media, Digital Marketing, Journalism, TV, Podcasting, Blogging and Vlogging. Recent alumni have gone into careers in social media, marketing and communication departments, political campaigning, journalism, PR agencies and digital technology companies.

#### 3. Course structure

This is a guide to the overall structure of your course, mandatory elements, modules (noting the terms that they are completed), and periods of assessment.

We have designed our curriculum so that you can gain a deeply personalised education. It is built on latest academic thinking, informed by in-house research. You will expand your knowledge, skills, practice and thinking with three building blocks to make you a great practitioner:

**Subject Core**: You will gain deep expertise in Media and Communications through a range of specialised modules. The subject cores provide a mix of theory and practice. They offer both historical overviews alongside critical analysis of contemporary case studies related to ethical, political and legal challenges in the global digital communications industries. In the practical modules you will experiment with various formats of media production to develop your own creative voice.

**Industry & Entrepreneurship**: Each level of your study includes a learning component that enables you to discover and plan your professional goals:

- During the Spring Term of Level 4 (year 1) you will take the module
   "Exploring Industry and Entrepreneurship" you will explore the world of work,
   in the Media and Communication industries and its future with a view to
   informing your own potential career or entrepreneurial journey. You will be
   supported by experts in the Careers, Enterprise and Industry services and
   the university careers platform, Handshake.
- In the Spring Term of Level 5 (year 2), you will experience a real challenge from the world of work by choosing one of three modules. If you choose "Industry Challenge" you will collaboratively work on a real live industry project so as to project manage, research and test concepts to address the challenge. In the "Enterprise Challenge" option, you will be guided to develop your own concepts, pitch your ideas to an external panel and create an entrepreneurial plan. Finally, you may choose the "Work Placement" module, where you will have the opportunity to acquire a range of work-based skills by taking an approved work placement.
- The Industry and Entrepreneurship learning you would have acquired in the
  previous two years of your studies is integrated into the final year (Level 6)
  Major Project. For your Major Project you will have the option to build and
  develop your unique idea into a full enterprise project or to engage in a more
  academic Major Project that has an element of Industry/professional
  application.

**Special Electives**: You will be able to choose from a range of electives that go beyond your core discipline and gain even more future-focused skills. The Special Electives take either a i) skills focus; ii) interdisciplinary focus; iii) or specialist subject focus and are designed to respond to your interests and emerging global trends. These are not tied to a specific discipline and are available to every Undergraduate student in Regent's. They are designed to be hyper-relevant to the world we live and work in – now and into the future. In this way, you will consider

your core subjects from new angles or add more value to your personal brand with a secondary discipline or language.

Languages are central to the university's identity and throughout your degree you will be able to choose to learn one of these: Arabic, Chinese, French, German, Italian, Japanese, Portuguese, Russian or Spanish. Language study enhances your personal and professional development. It enables you to understand and imagine new worlds and to communicate with others to build connections.

At level 4 you will take two electives, one in each term. You can choose to study a language in both terms or take "London Perspectives" in Autumn and "Global Perspectives" in Spring.

London Perspectives will utilise London as a learning platform. Through a combination of on-campus activities and field trips to key venues, you will encounter contributions that the city and its people have made to a range of fields, including your own academic specialism. In Global Perspectives you will learn how to work collaboratively across contexts and cultures to improve the communities we are living.

At Levels 5 and 6 you will take 1 Special elective plus one Language Elective (or a further Special Elective) in each term. Each term offers a choice of twenty special electives at each level (see table below course structure).

In combination your experience in these three blocks will challenge your thinking in unexpected ways.

At Level 4 (Year 1), you will also take "Learning Perspectives", a common module for all undergraduate Regent's courses. This module will induct you to Regent's pedagogic approach. You will acquire discipline specific and interdisciplinary skills, knowledge and approaches to learning which you will apply during your university study and beyond. Additionally, you have the option to study abroad in the second term of the second year of your degree (Level 5) at one of the University's international partner institutions. In this way you will immerse yourself into a new culture while expanding your knowledge and skills in your field.

# Optional Integrated Foundation Year (Level 3 or Year 0)

The optional integrated Foundation year will prepare you for degree-level study, introducing the basics of your destination degree area and a range of key skills and exciting topics that will serve as an introduction to the unique Regent's degree model.

While your subject modules will be with students heading towards the same or related degree courses, the skills and topics modules will include students preparing for a variety of degree courses enabling you to mix, learn and co-operate with peers who will bring a range of different perspectives, knowledges and approaches to the classroom and beyond. Through that experience you will be able to bring that broader understanding back into the learning in your subject modules, just as you will experience at degree level through the interaction between your core course and the Special Electives and Industry & Entrepreneurship modules outlined above.

In your first term you will take a core module related to your destination degree for 20 credits alongside four shared modules covering key skills and knowledges each 10 credits. The shared modules will cover 'Writing for Success', 'Critical Thinking', 'Cultural Understanding', and 'Politics, Society and Citizenship.

In your second term you will again take another core module related to your destination degree alongside four shared modules covering key skills and knowledges each 10 credits. The Shared modules for Term 2 are: 'Communications', 'Creativity and Entrepreneurship', 'Cultural Industries', and 'Making Use of Data'.

Level 3 will provide a rich student experience to ensure that you begin your degree at Level 4 to confidently get the most out of our unique degree experience.

The academic year for the course follows the regular university undergraduate calendar (https://www.regents.ac.uk/admissions/academic-calendars):

- Autumn Term: September to December.
- Spring Term January to May.

If you are a January starter on Foundation (level 3), you will able to complete your foundation year in six months by taking a summer term in order to complete the Foundation year by the end of July. This will allow you to start your second year of your study (first year of your degree) in September.

Classes take place from Monday to Friday, typically between 09:00 and 19:00 Assessments are scheduled throughout the academic year. Submission dates can be found on the Blackboard page of the module and the assessment brief. If you choose to study abroad, you will do so in the Spring Term of Level 5. Some destinations have term times that differ from Regent's University London and may start as late as March and end as late as June

Work Placements would normally take place in the Spring Term of Level 5, although might be scheduled in the summer holiday.

# **Modules**

Your course is composed of a number of modules that each have a credit value. On successfully passing each of these modules, you will gain credits that count towards the total needed for your degree.

One credit equates to 10 notional hours, which is the average time a student will take to achieve the specified learning outcomes. So if a module is worth 10 credits, then you would expect to spend 100 hours studying this. These will not all be 'taught' hours. You will receive guidance and instruction through workshops, seminars, lectures etc., but you will also need to engage in self-study. A percentage breakdown of teaching contact hours and self-study required on this course is indicated in Section 6.

On an undergraduate degree course, you can usually expect to study 120 credit per level (or year), with no more than 80 credits per term.

# Course modules - Level 3/4/5/6 (Year 0, 1, 2, 3)

# Course Structure Level 3/Year 0

#### 4. Exit awards

For UG refer to section E9 of the Academic Regulations, note if the exit awards are different to this

# 5. Learning outcomes

This is a guide to the more specific knowledge and skills you will gain if you take full advantage of the learning opportunities available to you.

Learning outcomes will tell you what we expect you to know and/or be able to do once you have completed a learning process (i.e. a module, a level or the entire course) (QAA, 2018). Teaching and assessments are designed accordingly to enable you to demonstrate that you have adequately met these outcomes.

The learning outcomes that you will be expected to demonstrate at the completion of each level of your studies, are listed below. Each module that you will study, has developed 2-4 distinctive Module Learning Outcomes (MLOs). Each MLO is mapped against an equivalent Regent's Learning Outcome from the list below. We have ensured that at each level, all the compulsory elements of your course, assess in their totality all ten learning outcomes (see section 16).

LEVEL 3 OUTCOMES	
RLO1 Collaboration	Determine collaboration and networking opportunities in well-defined settings
RLO2 Innovation	Recognise and describe value propositions, combining curiosity and creativity.
RLO3 Professional	Show the value of managing your own learning and of
Development	planning your personal and professional development
RLO4 Decision-making	Explain different ideas, including your own, as part of decision making
RLO5 Communication	Communicate appropriately for your audience and purpose in multicultural and/or international settings
RLO6 Digital Data and	Choose appropriate digital tools and data to present your
Tools	ideas in familiar and well-defined contexts

RLO 7 Discipline Knowledge	Explain pre-defined theories, concepts and facts in your field of study relevant to the task
RLO8 Discipline Skills	Use a limited-range of established discipline-specific knowledge, techniques and tools for practical purposes
RLO 9 Interdisciplinary Perspectives	Describe perspectives from a range of disciplines in well-defined scenarios
RLO10 Human and Environmental Impact	Demonstrate the impact of human activity on people and on the environment.
LEVEL 4 OUTCOMES	
RLO1 Collaboration	Explore collaboration and networking opportunities to generate ideas for given situations.
RLO2 Innovation	Define and compare value propositions, combining curiosity and creativity.
RLO3 Professional Development	Identify opportunities for your learning and your personal and professional development
RLO4 Decision-making	Investigate and contrast different ideas, including your own, to inform decision making
RLO5 Communication	Communicate your arguments/reasoning, orally and/or in writing in multicultural and/or international settings within familiar and well-defined contexts
RLO6 Digital Data and Tools	Use digital tools and data in familiar and well-defined contexts
RLO 7 Discipline Knowledge	Explain theories, concepts and facts in your field of study relevant to the task
RLO8 Discipline Skills	Use established discipline-specific knowledge, techniques and tools for practical purposes
RLO 9 Interdisciplinary Perspectives	Identify and contrast perspectives from different disciplines in given scenarios
RLO10 Human and	Explore the impact of human activity on people and on the
Environmental Impact	environment.
LEVEL 5 OUTCOMES	
RLO1 Collaboration	Collaborate and use appropriate networks to solve challenges
RLO2 Innovation	Analyse and develop value propositions, combining curiosity and creativity.
RLO3 Professional Development	Develop a plan for your professional development

RLO4 Decision-making	Analyse and reflect on different ideas, including your own, to inform decision making
RLO5 Communication	Communicate <i>effectively</i> both orally and/or in writing in multicultural and/or international settings within unfamiliar and well-defined contexts
RLO6 Digital Data and Tools	Analyse and use digital tools and data responsibly in unfamiliar, well defined contexts
RLO 7 Discipline Knowledge	Examine and apply theories, concepts and facts in your field of study relevant to the task
RLO8 Discipline Skills	Employ discipline-specific knowledge, techniques and tools for practical purposes
RLO 9 Interdisciplinary Perspectives	Investigate and apply perspectives from different disciplines in multifaceted scenarios
RLO10 Human and Environmental Impact	Analyse the impact of human activity on people and on the environment.
LEVEL 6 OUTCOMES	
RLO1 Collaboration	Collaborate and build networks to solve challenges in complex settings
RLO2 Innovation	create and implement value propositions, combining intellectual curiosity and creativity
RLO3 Professional Development	Articulate a plan which encompasses opportunities for your professional development
RLO4 Decision-making	Formulate informed decisions using critical and reflexive thinking
RLO5 Communication	Communicate <i>effectively</i> both orally and in writing in multicultural and/or international settings.
RLO6 Digital Data and Tools	Appraise and utilise digital tools and data in your professional and social contexts.
RLO 7 Discipline Knowledge	Critique and synthesise theories, concepts and facts in your field of study relevant to the task
RLO8 Discipline Skills	Combine and employ a wide range of discipline-specific knowledge, techniques and tools for practical purposes
RLO 9 Interdisciplinary Perspectives	Integrate perspectives from different disciplines in multifaceted scenarios.
RLO10 Human and Environmental Impact	Evaluate the impact of human activity, including your own, on people and on the environment.

# 6. Learning and teaching strategy/ assessment methods (non-regulatory)

This is a guide to the academic opportunities available to help you achieve the overall aims and objectives of the course and the intended learning outcomes in Section 5. It is also a guide to the assessment methods used to test your achievement of the intended learning outcomes. In order to meet the full intended learning outcomes of the course, you will be expected to study independently, participate in class discussions, ask for support in academic skills if required and engage with your personal tutors.

The Regent's Learning, Teaching and Assessment Strategy (LTAS) outlines the vision of Regent's pedagogic and assessment approach. It strives to provide you with a well-connected, future facing, entrepreneurial, cosmopolitan and personalised education whereby you can achieve your full potential. It comprises of fourteen priority areas:

- take a personalised approach to student learning: finding out about their previous learning and experience, offering individual guidance to help them plan their journey through university and beyond.
- 2. involve students in decisions about their learning, by giving them access to a dashboard of data on their progress, explaining our teaching methods and giving students increasing autonomy to create their own educational journey.
- 3. enhance student research, thinking and communication skills through their specialist subjects, in a culturally diverse, global context.
- 4. ensure that students have the knowledge and skills to bring more than one perspective to any challenge, both through their specialist studies and through specially designed, team-taught activities to prepare them for future impact in their chosen personal mission.
- 5. embrace a teaching approach where students collaborate with each other and with the tutors, and where diverse learning needs can be met
- 6. provide learning activities which are active, often based on finding responses to real-world challenges; these activities will cross subject boundaries, and challenge orthodoxies by providing opportunities for students to explore alternative ways of thinking; they will allow students to take risks and have fun.
- 7. make use of flexible learning and novel on-campus space configurations to promote experimentation and discovery; and we will take learning outside the classroom, with London as an unparalleled resource.
- 8. provide students with tutors who are expert researchers or practitioners in their fields, who will facilitate learning, and who are engaged in continuous professional development both as teachers and in their specialist fields.
- 9. embrace the potential of digital technologies in supporting learning
- enhance students' global network and intercultural communication skills, through engagement with our international partnerships and offering tuition in many different languages
- 11. base assessments on real-world tasks, projects and challenges, relevant to the future
- 12. help students develop the capacity to evaluate their own work and learning, through in class activities (in self-assessment, student-to-student assessment and academic integrity)
- 13. provide feedback from different sources on student work, recognising what they do well and providing guidance to help learning and improve student work

14. offer students an achievement portfolio where all their feedback is collated in one place, helping them to make sense of the feedback, and giving them something they can take with them when they leave Regent's to build evidence they can use for future employers

Your course is premised on the Regent's Curriculum model which defines the structural design of our Undergraduate degrees and allows us to deliver the above learning & teaching priorities. You course provides you with in-depth knowledge and skills in your field through specialised subject cores whilst at the same time it exposes you to multi-disciplinary breadth through a range of future facing special electives and language options. Additionally, it develops your professional capabilities thorough an integrated approach to Industry and Entrepreneurship; at each level you will take modules that enable you to explore the world of work and engage you with real work challenges.

Your course therefore actively encourages you to connect all areas of your learning and build your customised, coherent high-impact learning narrative in the pursue of a personal and professional mission.

The Regent's Graduate Attributes express our educational purpose and identity which is to ensure that Regent's graduates are:

- Collaborative and networked
- · Creative and entrepreneurial
- Critical and Reflective
- Culturally and socially versatile
- Digitally agile
- · Well-informed, skilled and fluent across disciplines
- Responsible and environmentally conscious

To realise this purpose, we have articulated these Attributes into a set of ten observable and measurable university wide learning outcomes, The Regent's Learning Outcomes (RLOs). They were designed using national references to ensure that they are appropriated for the award of a UK degree and that your achievement in monitored again those national references. Teaching and assessments are designed accordingly to enable you to demonstrate that you have adequately met these outcomes.

In this course, you will learn through interactive classes and hands-on workshops exploring new media communication technologies. You will regularly go on field trips to London museums, media companies and other relevant organisations. You will use a variety of digital platforms for your learning, including Blackboard and Padlet.

You will learn about current trends, challenges and issues in Media and Communications based on contemporary material updated each year. You will participate in challenges and debates, conduct audience research, analyse and produce digital media products (such as websites, animations, digital art, metaverse environments, apps and games). You will be presented with a variety of tasks,

mirroring the day-to-day jobs of media professionals, from social media managers to journalists. You will research audiences and produce media products for targeted groups including blog posts, articles, reviews, social media stories etc and in your final year, you will create a showcase portfolio that you can share a potential employer. This portfolio develops and showcases your skills and ability to critically evaluate current media trends and analyse key concepts and challenges in media industries.

There are modules with creative assessments in both terms of Level 4 and 5 and in the final term of Level 6. In all cases, these modules include module learning outcomes centred on the acquisition of discipline skills. The creative assessments consist of two parts: the creative product and the critical reflective piece. The creative artefact is produced to a high standard enabling skills acquisition. To complement that, a second assessment will require you to critically reflect on your work, identifying strengths and weaknesses, emphasizing the importance of critical engagement with the material.

# Breakdown of teaching methods by percentage per level

The following breakdown is a guide to how much time you will spend doing each teaching and learning method. The exact amount of time spent in taught/practical lessons or self-study will depend on the elective modules that you take.

- 'Taught' learning typically refers to timetabled sessions led by a member of academic staff, such as workshops, seminars, masterclasses, lectures and tutorials
- 'Practical' sessions are also timetabled and led by an academic member of staff, but are focused on practical work such as studio and laboratory work, field work undertaken on external site, external visits, etc
- 'Self-Study' is time dedicated to self-directed learning that is guided by your own requirements to further your studies and complete assignments. This could include preparation for class, background reading, research and preparation for assessments, and writing.

Level 3	Level 4		Level 5		Level 6		
Taught	32%	Taught 16% Taught 1		16%	Taught	14%	
Practical	0%	Practical	8%	Practical	8%	Practical	10%
Self-Study	68%	Self-Study	76%	Self-Study	76%	Self-Study	76%

# Course management and teaching staff

The course is managed by the Director of Content and the Course Leader. Your tutors are educated to masters or doctoral level and have relevant industry experience in media and communications. They have authored and edited books as well as articles published both in the international press and in academic journals. They regularly speak at academic conferences as well as public events. They have work experience in public and private broadcast corporations and as independent journalists, producers, photographers and filmmakers. In addition, most of our tutors hold a Fellowship of Advance Higher Education

(Advance HE) from Fellow to Principal Fellow level. Tutors are highly experienced in teaching. New tutors are supported in taking the Postgraduate Certificate in Higher Education.

You will be allocated a personal tutor, who will meet you on a one-to-one basis at various stages throughout the academic year and give you guidance and advice to support your ongoing personal and professional development throughout your studies at Regent's University London.

# Assessment strategy and methods

Assessment is a positive element of your education. We are committed to delivering authentic assessment and challenge-led learning. This ambition is reflected in our new <u>Assessment Framework</u> where we outline the practices and expectations which will guide and enhance assessment, one of those practices being to move away from unseen written examinations as an assessment methodology and moving towards more authentic challenges. We're in the business of nurturing future leaders who can use what they've learned to shape the world – authentic assessment and real-world challenges create a safe lab for that learning.

Assessment can be a learning tool and a guide to **understand and evaluate** the quality of your work and your progress. Your course will offer a variety of assessment methods that support the learning required by the learning outcomes. We will provide you with feedback on your assessment's performance to guide your learning journey. You will play an essential part in our assessment strategy as an active feedback recipient, and we will work together to determine how you can progress further from the feedback received.

There are some differences in the purposes of the assessment you will encounter: some assessments are formative and others are summative.

**Formative assessments** will provide you with an opportunity to receive feedback on the progress of your work through the completion of an assessment or assessment tasks. These are developmental in nature as they offer information to help you identify next steps in learning and how to do better in future work which is why no grades are given. Formative assessments feed directly into summative assessments. All assessment tasks include formative assessment opportunities.

**Summative assessment** is the evaluation of your learning at a particular time, measured against specified learning outcomes. You will be awarded a grade and numerical mark for each summative assessment on each module. The grades you receive for assessed work on each module are added up to give a final grade for the module. Assessment also determines your suitability to progress onto the next year of your course and, at the end of the course, it enables the University to determine your degree award.

All assessments will incorporate effective and constructive feedback that relates to the module-specific or task-specific marking criteria previously made available in the assessment briefs. Feedback for summative assessment will explain the reason for the

mark given but it can also provide information about how to improve the work for future assessment tasks.

The table below lists possible ways your tutors will facilitate the delivery of feedback on your formative assessments:

Forms of Assessment	Ways to deliver feedback on formative assessments
Written Assignments	Feedback on draft submitted on blackboard by a specified
(various types)	date
	Feedback initiated through peer to peer reviews during workshop activity
	Verbal feedback (face to face or recorded), where student makes a record of key points and shares with the tutor
Presentation	Presenting a practice run in class, receiving feedback from peers and/or tutor
	Formative feedback on recordings of presentation practice
	submitted on Blackboard by a specified date.
	Feedback on students' own assessment on the recorded
	practice presentation (both submitted on Blackboard by a specified date)
Creative Work	Feedback from tutors/peers through an exhibiting event.
	Students make a record of key points and shares with the
	tutor
	Feedback on student's own assessment of their work
	Verbal feedback (face to face or recorded), where student
	makes a record of key points and shares with the tutor

You will receive feedback in orderly and timely fashion (approximately 3 weeks from submission date). We will notify you of the feedback release day in your assessment briefs.

Assessments on the Media and Communications course's core modules will be varied between written essays, reports and case studies, presentations made both individually and in groups as well as production of media content. This may include video blogs, podcasts and media campaigns.

All submissions will be clearly explained and dates of submission clearly expressed in an assessment brief which each student will receive at the commencement of each term. The assessment brief will outline the requirements for each module, the dates of submission and the rationale for marking on each piece of work.

If you are on a support agreement (SSA) you may be offered alternative assessments in accordance to the Guidelines of the University's Disability Guidelines for Alternative Forms of Assessment.

The course includes the opportunity to undertake a term of study abroad at one of our international partner institutions in the second term of Year 2 (Level 5). You must apply and confirm your Study Abroad option by the end of first term of Year 1 (Level 4). The curriculum and credits in the partner institution will be mapped to your modules as

required by the course. Your Study Abroad application and learning agreement will be subject to the discretion and approval of your Director of Content or Course Leader. All grades received at an international partner university will be converted to an equivalent Regent's University London grade, in accordance with the institutional grading scale and grade conversion table. The average grade will represent 50% of the overall mark associated with Level 5.

If you choose the 20-credit "Work Placement" module in the Spring Term of Level 5, you will be assessed according to the assessment methods specified in the equivalent module specification.

# Ethical approval of research

All research and other academic activities conducted within and outside the University by students at Regent's University London should comply with Regent's ethics policies and process prior to its commencement. This will include, but is not limited to, all academic work involving human or other living participants, all industry live projects and all experiments, investigations and procedures involving human or other living participants, or data relating to such living entities.

# 7. Relationship to other courses

Some courses share modules or have other connections to other courses. This is a guide to whether this is applicable for your course.

At the foundation level (level 3), there are eight shared modules that are common to all integrated courses.

The Regent's Special Electives, the Language electives and the Level 5 Industry and Entrepreneurship modules are offered on all Undergraduate courses, in addition to the Subject Core modules for individual courses.

Students wishing to continue their studies at Regent's can enrol on the MA Media and Digital Communications.

#### 8. Student support

We want you to make the most of your time at Regent's and we also know that sometimes life at university can be hard. We can give you the support and you need, on academic study, language skills, careers, disabilities, mental health, gender, sexuality, finance and many other issues.

Regent's Student Hub will be the first port of call for the majority of your needs. Staff in the Hub can either deal with your enquiry directly or point you to one of our services for more help.

Our support services include:

- Personal tutor scheme
- Student Services
- Academic Skills
- English for Academic Purposes
- Careers advice, including placements
- Disability support
- Accommodation
- Student Union

For more information about life at Regent's and the services we offer, visit: regents.ac.uk/information/student-life/for-current-students

# 9. Learning support

Regent's offers a variety of different facilities and technologies to support your studies. These include seminar rooms, lecture theatres, collaborative work spaces, the library, IT labs and specialist software.

As a student on the Media and Communications BA you will have classes in the TV Studio and can also use the Sound booth, a number of dedicated editing suites and filmmaking equipment from our dedicated Media Services team which comprises broadcast standard equipment and software including Red, Sony and Black Magic cameras, Foley Studio, sound mixers and Celeb lighting. For photographic assignments, you will have access to Canon 60D, 750D, or 700Ds.

All key teaching areas are readily accessible.

You will also be provided with a free Adobe Creative Cloud licence.

If you require support or advice with regard to accessing campus facilities, please speak with our disability support officer, so we may address your concerns.

regents.ac.uk/information/student-life/for-current-students/disability-information

The Library at Regent's supports teaching and learning at the University. Our relevant and extensive collections, flexible study spaces and knowledgeable staff can help you achieve your academic goals. During term time, the Library is open until late in the evenings. During busy exam periods, it is open 24/7. Most areas are fully accessible to people with disabilities and wherever there are challenges we work with individual(s) to overcome, rearrange or support to facilitate good and safe access.

Regent's uses Blackboard as its virtual learning environment (VLE), where you will find learning materials and content for your modules. You will also submit your coursework online and receive feedback through Blackboard.

To support your studies and time at Regent's, there is a free mobile app which can be downloaded from the Apple or Android stores, which will provide information about the University, the campus and your studies.

Regent's has IT labs where you can use our computers and there are dedicated areas for you to use your own laptops and tablets. The campus has free Wi-Fi, including most areas of our extensive gardens, so any area can be adapted into a student study space. Regent's is a member of the Eduroam network, so you can connect to this service to access Wi-Fi worldwide.

For more about Regent's learning resources, visit: <u>regents.ac.uk/about/learning-resources</u>

# 10. Opportunities for personal development planning

Include any PDP built into the course. Indicate how a student can make choices within their course to tailor it to their own needs/career choices, e.g. through elective modules, dissertation topics, language choices, work placements. This section may also include career planning options, personal tutor course and extra-curricular activities.

#### **Extracurricular activities**

You will also have opportunity to engage with extracurricular activities on and off campus organised by staff from across Regent's. These include but are not limited to: prominent guest speakers' presentations, conferences, competitions, university societies, Student Union membership and student representation. Participation in competitions or engagement with societies and Student Union are a great way to develop a host of skills and evidence demonstrating your diverse capabilities and can contribute to fruitful personal development planning.

#### Careers, Enterprise and Industry

The Careers, Enterprise and Industry team supports students' individual career aspirations through a personalised approach. We partner with students to help them to acquire attributes, tools and skills to be able to make informed decisions and manage their entire career.

# Handshake – jobs, employers, events and resources

We've partnered with Handshake – our careers platform – to offer you:

- Careers and enterprise resources giving you all the information you need to succeed
- Local and international jobs, internships, and placement opportunities
- Networking opportunities with companies of all sizes, as well as start-ups
- Careers and enterprise events and workshops
- The chance to create and build your own profile to personalise the type of content you see, the employers you engage with, and the types of job opportunities highlighted to you.

# Placements and internships

Students looking to undertake a placement or internship as part of their studies can receive support in developing their application, as well as advice and guidance when sourcing suitable placement and internship opportunities.

We also offer similar support for students who wish to enhance their learning by undertaking an internship during the summer period.

# Careers appointments and drop-in sessions

Students can book an appointment with a career consultant to discuss anything career-related or book some career coaching sessions as a student and/or after they graduate. They are encouraged to engage with the careers team as early as possible in their study. It can take time to gather an array of career management skills, and to be empowered to explore options and plan their next steps.

Careers appointments are booked on Handshake and are either virtual on Handshake or in-person. Appointment types include, but are not limited to, career conversations, entrepreneurship and enterprise, career coaching, placements and Internships, applications feedback, and interview preparation.

The Careers, Enterprise and Industry team has an open-door policy. Students can drop in anytime during business hours to ask a quick question about anything careers, enterprise, or industry related.

# **Enterprise and entrepreneurship**

Regent's is excited to provide a comprehensive, entrepreneurial offer for students and graduates.

This flagship initiative is known as **The Founder's Programme** – a hands-on programme to support students and graduates interested in starting their own enterprise, with tailored guidance, access to live sessions with in-house consultants and guest speakers, mentoring, coaching and experiential bootcamps.

The programme is a dynamic, immersive learning experience where students will build the foundations of their start-up with a global team and get a chance to pitch to investors at the end of the programme – allowing you to network and connect with peers, alumni, industry leaders and start-up founders.

# Co-working spaces

Regent's also offers a dedicated co-working space available on campus with an opportunity to work on your business idea while collaborating and sharing ideas with peers. We also have a strong network of partnerships with some of the most noted coworking spaces in the country.

#### 11. Admissions Information

Details of the University's entry requirements can be found at: <a href="Entry Requirements">Entry Requirements</a>

# 12. Visas and immigration

At Regent's, you will be part of a truly international community, with the opportunity to make friends and contacts from around the world.

If you require a visa to study in the UK, please visit the Visas and Immigration page on the website: regents.ac.uk/study/international-students/visas-and-immigration

# 13. Assessment and progression regulations

You will be assessed on how well you are achieving the intended leaning outcomes at different stages throughout your time of study at Regent's

In order to continue with your studies, there are minimum requirements to be met in order to progress to the next level of your course. The current progression regulations are published within the Academic Regulations on our website at the link below. These are subject to review and amendment each year. We will let you know if there are any major changes to the regulations that may affect you.

regents.ac.uk/about/governance/academic-governance/academic-regulations

You will be provided with guidelines on what you need to achieve in each assessment to ensure you receive a good mark. A generic description of each grade can be found at the <a href="Common Assessment Scale">Common Assessment Scale</a>

#### 14. Award criteria

To complete your course, you will need to achieve 360 credits for an undergraduate degree.

You must also meet the requirements of any specific regulations as stated under the Assessment and progression regulations section.

For further details on award requirements, please see the Academic Regulations, available at on our website at the link below. The regulations are subject to review and amendment each year. We will let you know if there are any major changes to the regulations that may affect you.

regents.ac.uk/about/governance/academic-governance/academic-regulations

# 15. Methods for evaluating and improving the quality and standards of teaching and learning

All quality assurance policies and procedures are found in the University Academic Regulations. The current versions are available at the link below. The regulations are subject to review and amendment each year. We will let you know if there are any major changes to the regulations that may affect you.

regents.ac.uk/about/governance/academic-governance/academic-regulations

Regent's University London operates a number of institutional processes for ensuring and enhancing its academic quality standards. These include: course (re)validations, course modifications, course monitoring, student feedback systems and external examining.

# Course (re)validations

The University has a formal process to approve a new course or reapprove an existing course of study. This involves a panel of academics from within and outside Regent's to ensure that your course is of appropriate academic standard and of a high quality.

#### Course modifications

We listen to your feedback and make changes to your course as appropriate. You will be consulted on any significant changes to your course which may affect the outcomes of your study. All changes to courses or modules are subject to approval through Regent's academic governance structures.

# Course monitoring

In order to ensure courses continue to meet their academic and professional aims and objectives, Directors of Content/Course Leaders are required to prepare an annual monitoring report (AMR). The reports include module feedback as well as external examiner reports and responses. They are reviewed at faculty and institutional level.

#### Student feedback systems

Students play a key role in the University's processes for enhancing the quality of its educational provision and broader student experience. There are multiple ways for you to provide feedback on your experiences at module level (e.g. through questionnaires), course level, through student representatives and at course committees. Final-year undergraduate students (Level 6) are invited to take part in the National Student Survey (NSS).

#### External examiner reports

External examiners ensure that Regent's standards and quality processes are appropriate and are of a standard comparable to those of other higher education institutions. There are two types of external examiners. One reviews subject level assessment and the other reviews institutional level processes and attends the progression and finalist boards.

An annual external examiner report is produced at the end of every academic year at levels 5, 6 and 7. These are made available to students through the AMRs.

#### 16. Curriculum map

This table indicates which study units assume responsibility for delivering the learning outcomes detailed in Section 5.

	Module	LO1	LO2	LO3	LO4	LO5	LO6	LO7	LO8	LO9	LO10
